THE THEORY AND PRACTICE OF MECHANICS

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 106 pages. Dimensions: 9.7in. x 7.4in. x 0.2in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 Excerpt: . . . of nut 40, 000 x. 15 x ir x 2. 375, work of lifting 40, 000 x. 1. The equation of work therefore becomes $F \tan \alpha$ (a 2. 5 0), whence $F = 340$ lb. Otherwise, from the formula obtained above for the friction of a squarethreaded screw with nut, namely, $F \tan \alpha$ (a 2. 5 0), we have in the present case $\tan \alpha = \frac{f}{d}$ and $\tan \alpha = \frac{f}{d}$, whence $\alpha = 13$ and $\text{Low } f = 8.32$. Also $W = 40,000$ lb., $d = 1.5$ in., and $J = 36$ in. Substituting these values in the formula, the result is $F = 328$ lb. 281. A screw of mean diameter 2J in. has 4 threads to the inch. Assuming the coefficient of friction as .08, calculate its efficiency. 282. A 1-in. bolt has 8 threads to the inch of mean diameter. 93 in. Assuming the coefficient of friction as .15, find the torque necessary to raise an axial load of 3 T 283-A square-threaded screw has 5 threads to the inch of mean diameter 1. 2 in. What axial force will it exert when acted on by a torque of 40 ft.-lb. 91. Efficiency and Reversed Efficiency. --In all machines the work put into the machine is partly expended in overcoming friction, and is therefore greater than that obtained from the machine. The efficiency of a machine is defined as a. . output emciency input Since the denominator of this fraction...
